EDUCATION

University of Northwestern – St. Paul
B.S. Computer Science
B.S. Cybersecurity & Information Systems
Graduated Cum Laude, Dec 2025

TECHNICAL SKILLS

Languages
Python (5+ yrs), JavaScript, SQL, Java, C++,
HTML/CSS

Web & Data
REST APIs, relational databases, PWA / service
workers, Django (familiar)

Tools & Workflow
Git, CI/CD, AWS, documentation

Security / IT
Microsoft 365, Windows Server, Active Directory,
PowerShell, Nmap, Wireshark

Home Lab
VMs, firewall rules, log review, patching/updates

PROFESSIONAL SUMMARY

Computer Science & Cybersecurity graduate (dual B.S., Cum Laude) with 5+ years of Python experience and a strong foundation in the full web stack — JavaScript, HTML/CSS, SQL, and Git. Builds clean, maintainable applications with attention to detail and clear architecture, and works comfortably across the development workflow from database to interface. Seeking a software or web developer role with immediate availability.

PROJECTS

Budget Tracker — Offline-Capable Budgeting Web App (JavaScript, PWA)

- Built a responsive single-page budgeting web app in vanilla JavaScript, installable as a PWA with full offline support via a service worker.
- Implemented per-category spending tracking with rollover between periods, recurring/fixed costs, and persistent local storage.
- Live demo: danielsk-dev.github.io/My-Budget · Source: github.com/DanielSK-Dev/My-Budget

Churp — Peer-to-Peer Data Messenger Framework (Python)

- Built a reusable peer-to-peer messaging framework for structured JSON data exchange.
- Implemented a peer connection workflow using NAT traversal (UDP hole punching) to reduce reliance on manual port forwarding.
- Developed the networking and message-handling pipeline end-to-end with a focus on clean architecture and debuggability.

WORK EXPERIENCE

Operations Lead / Manager / Trainer — Froggy Hops

- March 2021 – Present*
- Promoted to a trainer role within 3 months; trained staff across yard, delivery, and warehouse workflows.
 - Led large delivery and setup stops, coordinating crews of 8+ and handling customer communication and on-site troubleshooting.
 - Managed inventory and job status using Monday.com and ERS, improving stock visibility and operational accuracy.
 - Served as operational backup in the owner’s absence, managing scheduling, staffing, and warehouse flow.
